

# Green Pauline

George said

'What a lovely morning we had with Pauline and what a welcome we got from her. Her knowledge of anything green is incredible. At 82 I now have an interest which I thought I would never have Pauline you have a lot to answer for but I can recommend Pauline for the simple way she explains everything...thankyou Pauline'

'Pauline prepared a step by step walkthrough of the seed propagation process for this workshop. The event whizzed by, she did an excellent job explaining the whole process asking us questions all the way to ensure we had understood everything and making sure each of us got hands on handling seeds, pricking out, potting on and finally with plants to take home. It was a fab event highly recommended and most of all great fun x'

'Pauline, I can't thank you enough for everything you taught me at your gardening workshop last Sunday. Who'd have known that there are good bottom plant pots, and bad bottom pots 😊. I for one didn't know this. I've since been checking them all in my garden! Your enthusiasm and passion for gardening is infectious. I couldn't wait to get home from the workshop with my tray of gorgeous seedlings and plants, and put your knowledge you shared, to the test. Knowing that you are on hand should I have any questions. You have such a wonderful, exciting way of sharing information and teaching Pauline. Thank you. Was very touched too witnessing a red mason bee hatch and fly off 🐝. AMAZING! Dad and I shall be keeping our eyes peeled for any follow-on workshops

👍 . x
